

QUALITY IMPROVEMENT & PATIENT SAFETY LEARNING

QI Co-Learning Curriculum

Enroll your trainees in this longitudinal curriculum where they will complete a year-long QI project mentored by a faculty member in your department. Participants attend two interactive AHD sessions on core QIPS content and have the opportunity to present their project at a research day. Contact [Dr. Samara Chitayat](#) for more information.

Tips for Supervising a QI Project

[This guide](#) provides tips to faculty members on what makes a good QI project and defines the steps needed to initiate and complete one.

Patient Safety Rounds

A New Look for M&M Rounds

[These e-modules](#) will help you understand the pitfalls of traditional morbidity and mortality rounds and why they need to change to a modern patient safety focused approach, to appreciate how system factors, human factors and cognitive biases contribute to patient safety incidents, and finally, how our hospital partners review and manage patient safety incidents. Contact [Dr. Seychelle Yohanna](#) for more information on the e-modules or for tips incorporating PSR in your program.

QI Consultation

Looking for opportunities to enhance your trainees' knowledge and skills in QIPS? Request a consultation with PGME's Director of QIPS Education, [Dr. Chris Hillis](#).

U of T QI Courses

U of T offers free access to their [self-learning e-modules](#) for anyone interested in improving quality in primary care.

HHS Centre for People Development

Learning and development courses for HHS staff. [Explore opportunities.](#)

Institute for Healthcare Improvement

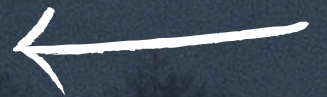

The [IHI Open School curriculum](#) covers a variety of topics relevant to today's health care workforce, including quality improvement, patient safety, etc.

Dept. of Medicine QIPS Community of Practice

The overarching goal is to support each other in our QIPS endeavors and to offer a platform for shared learning. Learn more on the [Dept. of Medicine website](#).

QI Elective

Is QI a foundational part of your training program? Consider [this 4-week elective plan](#) to build a foundation in QI methods and learn the tools to develop the basis for QI projects.

CPMA Patient Safety Primer

The workshop covers topics representing medico-legal issues frequently encountered by residents in CPMA case files: documentation, informed consent, disclosure of a patient safety incident, and teamwork. Trainees can [register directly online](#). Mandatory for R1s in Family Medicine and R2s in RC programs.
